Reflections (description of portfolio pieces)					X
Content of reflections appropriate					X
Project images are high quality					X
Spelling and grammar are correct					X

What was your overall first impression of the website?

The website was well put together and provided all information I would be looking for in a portfolio. It looked professional and did a good job at telling me what I was learning about Ashley.

Did you have any technical difficulties as you navigated through the pages and displayed the projects?

The "Download Resume" link wasn't functioning and would redirect me to the home page instead of actually downloading her resume.

What do you feel are the most effective design elements of this web portfolio?

The different page sections were very well established to tell me what part of Ashley's experience or skills I was learning about and I was always able to tell where on the website I was.

What would you suggest be changed with the design or content of this web portfolio?

On the portfolio page, where I would see all of the projects that she has worked on, I was unable to click the specific projects to direct me to the corresponding website and instead to scroll back up to the portfolio Button at the top of the webpage and click on the specific project in that drop down menu to go to the corresponding website. I would like to see the ability to navigate to different projects directly from the portfolio page and project descriptions.
